

ETHICAL JEWELLERY AWARD 2008

Nathalie von Hohenzollern

My design's source and philosophy is based on purity, genuineness and authenticity. Only a real and genuine inner inspiration allows me to create freely and unique. Working with clean gold brings me in touch with the enormous positive power and energy of the material, of mother earth, and my own true being.

In my opinion, clean gold is the finest, strongest and most radiant of all materials. Only clean gold, on wearing it, can connect somebody's consciousness with ones inner self, can inspire each and everyone, over and over, to sense the true power of a woman in herself. It brings every woman in touch with the roots of her genuine femininity, herself and into unity with mother earth.

Gold symbolizes femininity and accentuates every woman naturally at its best.

I believe, that clean gold is a symbol which mother earth has given us, to wear it as her child.

Working with clean gold had something magic in it, because it is so full of positive energy that it starts to inspire you. I also noticed the beautiful colour of the material, it has a strong yellow touch in it, which makes it look authentic, genuine and powerfull.
